1. Kulbyshev (53°10'N, 50°10'E)

a. 4th State Ball-Bearing Factory (GZ)

This plant was transferred to Kulbyshev from Moscow in 1941. It produces precision screws and ball-bearings for aircraft, tanks, and heavy machinery. As of March 1946, 10,000 workers were employed.

b. Aircraft Factories No. 1 and No. 18

Single engine monoplanes (type unspecified) are manufactured here at the rate of approximately 20 a day at each plant. In 1943 IL-2's were manufactured here. As of July 1946, 40,000 workers were employed.

c. Factory No. 24

Employing some 40,000 workers, this factory builds aircraft engines for Factories No. 1 and 18.

d. Kirov Aircraft Factory No. 140

Manufactured small parts for planes of unknown type. As of April 1946, production was undergoing conversion to agricultural machinery.

e. Aviotrust No. 11

Comprising 12 sections, Aviotrust coordinates its production with numerous aircraft factories throughout the USSR and produces parts for all types of Soviet aeroplanes. Approximately 10,000 workers are employed in three 8-hour shifts.

2. Syzran (53°05'N, 48°28'E)

Factory of the Red Army

Located along the railroad at a distance of approximately three quarters of a mile from Syzran, the factory produces a daily average of 2600 small land and sea mines (half-gallon size); tractors and related agricultural machinery at the rate of 40 units a month; and special ventilators for defense against gas attack. More than 2,000 workers are employed. Constructed in 1941 on a site formerly occupied by a flour mill, the factory is constantly expanding. As of April 1946 it comprised seven
